

Process for Polymerization of α -olefin

Abstract

The object of the present invention is to provide a polyolefin polymerization method which prevents fine particles of polymer from scattering from a fluidized bed in a gas phase polymerization reactor. This object is achieved by a process for polymerization of α -olefin in multi-stage polymerization process and in at least two serially arranged polymerization reactors including a gas phase polymerization reactor, the process comprising;

drawing out polyolefin particles from a polymerization reactor,
and

transferring the polyolefin particles into the interior of fluidized bed of a gas phase polymerization reactor of the next stage.
